Launch Date:	October 19, 2023
Launch Price:	EUR 1'000
First Monthly NAV:	October 31, 2023

Investment Strategy

It is a long-term value investment quantitative strategy, model driven, based on both fundamental and statistical analysis to capture the inner value of the assets.

For the two combined analyses a few indicators are considered and weighted in a Fuzzy Logics approach. Once selected the Investable Universe, a ranking of the instruments is created and only the top ones are considered as if we invest on them forever. A very last subjective supervision completes the decision-making process, despite the human intervention is reduced at the minimum. A few strategic layer positions can be created with a long-term horizon and an expected predefined distribution of cash flows.

It is a Long-Only Strategy, with a Long-Term horizon, low/zero turnover, and potential leverage limited to a maximum of 30% of the NAV.

FX risk is USD, EUR, GBP and it is not hedged.

Type of Assets

The RIV Capital SICAV-RAIF (the **"Fund"**) primarily invests in both liquid and illiquid assets. Its portfolio includes:

1. Liquid Assets: The Fund focuses on equity and debt instruments, primarily through mutual funds. These are selected based on both statistical and fundamental analysis, creating a diversified portfolio of 15 to 27 financial instruments or issuers (Markowitz's Theory).
2. Illiquid Assets: The Fund may also invest in below-investment-grade debt securities that are undervalued but expected to generate income or growth. This may include mini-bonds, securities from securitization vehicles, and private debt instruments issued under private placements. However, investments in venture capital, growth equity, buyouts, or private equity are excluded.

Regarding management strategy, the Fund pursues a long-only investment strategy, which aims to generate constant cash distributions to shareholders. The fund can apply both active and passive management strategies based on the specific Fund's objectives. In terms of active management, the selection of investments is driven by fundamental analysis, seeking undervalued opportunities. In passive management, the Fund may maintain exposure to diversified securities to match general market movements without frequent trading.
